

- general API returns JSON vocab
- F: frontend → React maybe or Rust + WA
 - I: API-1, fetches .net from Netflix containing subs
 - 2: API-2, converts .net to .txt
 - 3: API-3, parses API-2 .txt file } maybe can just be done w/ grep → "G"
 ↳ remove all $\backslash n$ and $< >$ tags 2+3
 - 4: API-4, formats .txt as JSON
 - 5: API-5, reduces list to root version of words
 ↳ word:
 num:
 translation:
 - D: combine all
 - T: software testing

G: incorporate translation code into API-5 process
 ↳ API-6

JULY 2 —————> JULY 12
 = 11 days!

* WATERFALL PROCESS
 ** Duration = hours
